### COMPANY DESCRIPTION

Flexible Products Company's Roofing Group provides a wide variety of polyurethane products to the roofing market. Founded in 1951, Flexible Products Company is the leader in custom polyurethane foam formulations and dispensing technology worldwide. The company serves multiple markets with its polyurethane foams, sealants and adhesives used by do-it-yourselfers, professional contractors, business and industry.

### PRODUCT FOCUS

The Roofing Group provides a complete line of portable polyurethane products to meet the needs of the roofing and insulation markets. The roofing line includes two professional adhesives used to attach insulation boards and roof tiles and foams used for insulation, void filling, and air sealing.

### MANUFACTURING FACILITIES

Flexible Products has manufacturing and administrative offices in Joliet, Illinois (Chicago) and in Marietta, Georgia (Atlanta). Regional warehouses are located throughout the United States and Canada to better serve our customers' needs.

### TECH SUPPORT, SALES, TRAINING, CUSTOMER SERVICE

Customers from the United States and Canada can call toll free, (800) 800-FOAM (3626). Roofing Technical Service is available to answer roofing application questions. Professional roofing territory managers and distributors are located throughout the United States and Canada to provide sales, training and technical product support. In addition, on-site training and certification in the use of these products is offered. The Customer Service Department may be reached from 7:00 a.m. to 5:30 p.m. CST to process and expedite orders.

For more information, contact Roofing Technical Service at (800) 800-(FOAM) 3626.

### MAJOR PRODUCT LINES

**INSTA-STIK®** is a portable adhesive kit used to attach roof insulation board in commercial roof applications. Penetrations to the deck caused by mechanical fasteners are eliminated with the use of Insta-Stik. Insta-Stik meets the requirements of Factory Mutual Class 1-60 and 1-90 fire and wind uplift resistance tests for monolithic deck applications. Consult with Roofing Technical Services for detailed information on FM Class 1-180, 1-210, 1-225 and 1-270 rated roofing systems. Insta-Stik also has FM approvals up to 1-315 for tapered polyisocyanurate and polystyrene insulation. Additionally, it meets the Underwriters Laboratories, Inc. (UL) 1897 wind uplift resistance tests for steel deck applications.

**TILE BOND®** is an adhesive kit used to attach concrete and clay tiles in residential & commercial roof applications. Tile Bond provides a superior, cost-effective method of tile attachment. No expensive heavy equipment is required. The consistent high quality adhesive is lightweight which reduces the roof load. Tile Bond has achieved an SBCCI Listing which is detailed in Evaluation Report #9744. It meets up to 120-mph wind speeds in specific applications. The Texas Department of Insurance has issued a Product Evaluation Report RC-28 for use of the product in the State of Texas.

**ROOFPAK®** is a portable kit that temporarily seals the edge of a single ply membrane at nightfall or in adverse weather. It is formulated specifically for roofing applications and provides the most cost-effective tie-off method available. It provides instant watertight protection to a roofing system and the building interior.

**FROTH-PAK®** is a spray foam kit available in several portable convenient sizes and densities. It is used to repair spray applied polyurethane roofs (2.75# density), test cut areas, or damaged insulation boards. Froth-Pak is also ideal for filling pitch pockets, low ponding water areas and fabricating on site cant strips. Another application is to fill small cavities, wall and floor penetrations, cracks and expansion joints. It is available in a Class I formulation to meet local building codes.

**INSTA-SEAL®** and **INSTA-PRO® FOAM SYSTEM** are single component foam sealants used to fill small gaps, cracks or openings. There are a variety of uses in industrial, commercial and residential applications to stop air infiltration. The newly designed Insta-Pro Gun is reusable on multiple cans and has an easy screw on attachment. The Insta-Seal product line creates a durable airtight seal, saves energy dollars and enhances the comfort of the building occupants.
